QR **Multilingual QR Menu**

Easy ordering for foreign guests

A QR menu that switches to your guest's phone language

Guests scan the QR on the table and the menu opens in their phone's language. No app to install, no reprinting paper menus.

한국어 · English · 中文 · 日本語 · Tiếng Việt

Menus live right now

Scan the QR with your phone camera or tap the screen to try it.

숯꾸이
Korean BBQ · Bắc Ninh

What you also get

A6 · PDF
Table QR card
A card that stands on the table. We can add your Wi-Fi and phone number too.

A4 · PDF
4 cards on one A4 sheet
One A4 sheet holds 4 cards. Print at a local print shop or office printer, then cut.

1080×1080 · 1080×1920
Social media promo images
Images for Facebook and Instagram posts and stories, and for sharing on Zalo. They show your menu screen and QR.

What makes it different

🌐 5 languages, automatic
It detects the phone's language and switches automatically; guests can also pick one. Each dish also shows its Korean and Vietnamese name so staff recognise it instantly.

🎨 Designed for your venue
Chalkboard and brush lettering for a BBQ house, gold and neon for a bar. We keep the logo and photos from your current menu.

🔳 Table QR cards included
Print-ready QR card PDFs (A6, or 4 per A4), with your Wi-Fi and phone number on the card.

✏️ Price changes made easy
When dishes or prices change, just send a photo or message. The QR stays the same, so no reprinting.

📶 Wi-Fi · Call · Map
Copy the Wi-Fi password, call the venue, or get Google Maps directions in one tap.

📱 No app needed
Point the camera and it opens. Works on iPhone and Android.

How it works

1
Send your menu
A photo of your paper menu or menu board is enough.

2
Review the draft
Check the 5-language menu on your own phone.

3
Place the QR cards
Print the cards and stand them on the tables.

4
Run & update
When things change, just send a message.
